Career Description

Logistics involves coordinating the transportation of goods, both domestically and internationally. Logistics professionals deal with issues involving buying, transporting, distributing, tracking and warehousing. In today's global economy, the role of logistics is more vital than ever.

Careers Available

Planner, shipping/receiving clerk, transportation coordinator, distribution supervisor, inventory manager, logistics analyst, warehouse supervisor, supply chain analyst, buyer/purchasing agent, customer service manager, import/export manager, purchasing manager, and logistics planner.

Entry-Level Salary

\$25,000 - \$30,000/yr.

Course of Study

Coursework includes computer applications, accounting, business law, management and international business. Students will solve different levels of logistics-related problems through case studies and supply chain projects utilizing logistical hardware and intelligent software tools.

**Recommended
Courses and Skills**

Strong math background (high school algebra strongly recommended).

**Helpful Personal
Attributes**

Analytical, critical thinking and problem-solving, technical/computer skills, adaptability to various work environments and the ability to manage detailed projects and work in a team environment.

Program Contact
