

Jewelry Design and Fabrication

Instructor: Nannette Gatti Davis

Course Description:

Learn the basics of designing and creating in metal. Using a variety of simple design methods, create custom jewelry designs and learn how to fabricate them from metal wire and sheet. Learn texturing, cold connection, basic findings, hammering techniques, and more. For beginning and experienced students.

Student Supply List:

Basic materials and tools for first few projects included in cost of the class. As we continue in the course more individualized items may be needed and supplies will be reviewed in class (possible costs from \$30-\$80 depending on project)

Please bring to the first class:

- Sketchbook or drawing paper
- Sketching Pencils/Eraser
- 2 extra fine tip markers
- Any tools or supplies intended to use in class
